MINING, BUSINESS AND STOCKS

ELECTRIC POWER FOR SEVIER CON

Company Will Build a Three Hundred Horse Power Plant in Clear Creek.

APPROPRIATED WATER.

And Will Construct a Seven Mile Transmission Line-Work Progressing On New Mill.

The Sevier Consolidated Mining company, which own a property in the Gold Mountain district probably second in importance to the Annie Laurie mine is going to use electricity in the operation of its new mill, which is now in course of construction

Several weeks ago Manager R. W. Foster, according to records in the office of the state engineer, located some valuable water rights in Clear Creek canyon, about seven miles from the millisite. This is to be the location of a power plant of 300-horsepower capacity and from it the electric fluid will be conveyed over a seven-mile transmission line to where the energy is to be

The contract for the equipment was let to the General Electric company | Special Correspondence, several weeks ago, and the equipment is now on the road from the factory. Work has already commenced on the excavations for the plant and a force of men is now engaged in diggling the holes in which the poles carrying the wires are to be set. The work of building the power plant, as well as the ing the power plant, as well as the mill, is to be rushed as rapidly as pos-sible with the expectation of getting the entire equipment in service before winter sets in in that region, which is usually several weeks in advance of the Sevier valley, owing to the alti-

WEEK ON EXCHANGE.

Tintle Stocks Have Been the Most Active Traders.

The week has closed with the record showing the sale of 61,720 shares of stocks for \$23,878.12, on the floor of the Salt Lake Stock & Mining exchange. Salt Lake Stock & Mining exchange.

Trading has been confined almost entirely to Park City, Tintic, Bingham and Alta stocks. Lower Mammoth proved to be in fairly good demand and has moved up about six cents a share on the strength of present developments. The work on the 1,500 level has reached the point that connection with the ore bodies may be looked for almost any moment. May Day has displayed quite a little activity around nine cents a share, while Grand Central has found a few buyers at about \$3,25 a share. Uncle Sam Consolidated was also active, but at no advance in prices. New York Bonanza weakened considerably, there being an impression abroad that the directors would levy an assessment at their next meetlevy an assessment at their next meet-ing. Wabash closed the week in beting. Wabash closed the week in better tone, selling on the open board today at \$1.80. Columbus Consolidated of Alta has been the recipient of considerable inquiry, and the stock sold up to \$2.25, but closed with a sale today marked up at \$2.

Today's closing quotations and sales were as follows:

STARLUS DEVELOPMENT.

One Hundred and Fifty Feet More Will Take Tunnel Into Ore Zone.

The development of the Starlus prop-Bingham is progressing very favor-

. Wall, the owner of the ground, said during the day that the tunnel has penetrated the mountain for a distance of about 1,000 feet, and that probably another 100 feet will take it into the monzonite copper ores. Some very good ore has already been encountered on the way.

very good ore has already been en-countered on the way. It is the intention of the colonel to utilize the mill in main Bingham can-yon for treatment of the ore a little

SMELTING NEVADA ORE.

Increased Changes by American of \$4 a Ton is Now in Effect.

On the 1st inst. the announcement

into effect. The United States company which is a competitor, it has been learned from Manager Fitch, has made no raise in its schedule of working charges from any source.

The fact is, with the present facilities of the American, it does not desire a very large quality of silicious ores from Tonopah and the mine owners of the camp who have not entered into a contract with the American, can only induce the latter to buy their ores after considerable persuasion, or perhaps with the understanding that in the future, when the Garfield plant is completed, the American will get their business.

The yards of the American company at Murray are fearfully congested at the present time; thousands of tons of silicious cress are piled up there waiting

silicious ores are piled up there waiting to be treated at some future time. The United States company, on the other hand, is pretty wall supplied with silicious ores from the Centennial-Eureka mine, and is not in the market for Tonopah and Goldfield ore for its Utah piant, but in a short while it will be able to handle it at its Mammoth piant in California.

able to handle it at its Mainmoth plant in California.

But this temporary lack of smelting facilities, and excessive charges as a matter of self protection, is going to result in the building of more mills in the

ault in the building of more mills in the Nevada dietrict.

The Tonopah Miner estimates that up to the present time the loss to the stockholders of the various mining companies that have been shipping ging from that district and Goidfield, in smelter charges, snile preentages, railroad and wagon freights, expense of sacking ores, etc., over and above what it would cost to mill the area on

railroad and wagon freights, expense of sacking ores, etc., over and above what it would cost to mill the ores on the ground, is approximately \$2,009,000. This drain still continues, and the increase of rates by the smelter-combine will still further increase the drain on the mines that are producing in that section of the country.

Prior to the advent of the railroads a great many mines were worked throughout the state of Nevada and produced immense quantities of buillon. It being absolutely impossible to ship the ores the long distances over the desert to reduction points, the people who were operating properties were compelled to devise ways and means for the treatment of their ores. The low values of the enormous piles of railings left by the old reduction plants from the ores of Candelaria. Ophir Cariyon, Austin, Pioche, and other milling plants about the state show how closely they were worked in the early days, even under adverse conditions and with a comparatively limited knowledge of the various processes. emparatively limited knowledge of the

rious processes.
The ores of Tonopah are practically the same as the Comstock ores and quite as amenable to treatment, and in view of the marked improvement in many lines of metallurgical practise, it is safe to say that higher savings can be made now than were made in the

early days.
In fact, it is freely predicted that in treating the high grade ores of the Tonopah district a saving equal to 95 per cent can readily he made, at a cost far below that of shipping and smelting. In addition the tailings from the operation of milling plants in that section would be left for retreatment, and in enrly days. nearly all cases sufficient values would!

nearly all cases sufficient values would remain to give a profit.

The establishment of milling plants at Tonopah for the reduction of ores means the employment of more men and the building up of more staple and prosperous communities, as well as the prompt treatment of ores of very much lower grade than can be successfully mined and shipped under the present system. In the history of all mining camps, their greatest success has come Muslin lace curtains at \$1.10, formerly camps, their greatest success has come from the ability to treat low grade ores, Sash Doors and Mill Work. Grand Fall Opening, Wed., Sept. 13.

DR. CROXALL ON NEVADA CAMPS.

Physician Says an Epidemic Need Not be Looked for in Goldfield Again.

SANITARY CONDITONS GOOD.

Speaks Favoraby of the Lida District -- Construction of Smalter Thera Progressing

> Dr. Willard Croxall, after a year's absence in Goldfield, has returned to

ewer tunnel through the property, conlecting upraises with the workings
bove. This will give from 800 to 1,200
cet above the tunnel level.

F. A. Darrenouge is superintending
the property and work began Monday

carried off only a govern of people was carried off only a score of people, was malignant or septic pieumonia, a dis-tase not at all new. Cripple Creek, Bisbee and nearly all

Cripple Creek, Bisbee and hearly all new mining camps in their early history suffered far more than Tonopah and Goldfield. The sunitary conditions, the doctor states, have been so improved that there is no further fear of a repetition of such a character. To residents of these camps, the gross exaggeration that reached papers printed throughout the country regarding the amount of sickness there were an the amount of sickness there were ap-

With regard to the mineral resources With regard to the mineral resources of Tonopah, Goldfield and the numerous adjoining camps, the dector says they are simply stupendous, quite beyond the comprehension of those who have not seen with their own eyes.

"I sincerely hope," said Dr. Croxall today, "that the wild-catters have had their day. They are the bane of every new mining camp, and following in w mining camp, and following their wake it is next to impossible to get legitimate propositions going.

"With the advent of the broadgage railroad into Goldfield, the middle of

rairoad into Goldheid, the middle of the present month, we will have greatly improved facilities for the rapid development of the country.

"A district that is opening up marvelously is Lida. A lead and copper smelter of 180 tons initial daily capacity is being repidly constructed. Wood and water is not so scarce in this district as in most of the camps of the country."

Dr. Crexall will shortly return to Goldfield to resume practise and attend to his mining interests,

MAKING CLOSE SAVING. The Wall Mill in Bingham is Doing Some Good Work.

success being attained at the Wall mill in Bingham on Silver Shield ore has been somewhat of a surprise, not only to Col. Wall, the owner of On the 1st inst. the announcement made by the American Smelting & Refining company of a \$4 increase in working charges on Tonopah ores, went into effect. The United States company which is a competitor, it has been learned from Manager Fitch, has made no raise in its schedule of working charges from any source.

The fact is, with the present facilities of the American, it does not desire a very large quality of silicious ores from Tonopah and the mine owners of the plant, but to Manager Joseph of the mine. In camp yesterday a general sample of the tailings was taken for assay and the returns received today showed that practically all the values in the ore are being saved. The return sheet indicated that .01 per cent and .03 of one per cent in copper.

It is very evident that the parties who have been figuring on making wages "down the creek" are going to meet with disappointment. meet with disappointment.

Arguments in Wall Case.

Arguments are being heard in the district court today on the motion of the attorneys of the Utah Copper company attorneys of the Utan Copper company to dissolve the restraining order in the injunctive proceedings, instituted a week ago by Col. Wall, vice president of the company. The defendants, in their motion to dissolve the injunction, contend that the court is without jurisalizing.

BUSINESS IS NOW IMPROVING.

From all Quarters News Coming In is That Commercial Conditions Are Satisfactory.

LABOR STRUGGLES VERY FEW

Harvesting is Proceeding Under Most Favorable Conditions -- Prices of Commodities Rise,

New York, Sept. 8 .- Dun's Weekly Review of Trade tomorrow will say: "Commercial news continues most satisfactory, improvement being reported in almost every case, except the further declines in prices of securities. Crops are being harvested under most favorable conditions and a few weeks more without severe frost will put the yield of corn and cotton beyond danger.

"Industrial progress is accelerated by the broadening demand for iron and steel products, textile mills and shoe factories are well occupied, while the demand for material testifies to extension of building operations. Considering the prosperous conditions, labor struggles are exceptionally few.

"Liberal consumption has caused a further slight rise in the level of commodity prices, Dun's index number on Sept. 1 advancing to \$100,308 from \$99,846 a month previous and \$79,842 a year ago, when business was much less vigorous. Some congestion of traffic is noted, and railway earnings in August were 6.3 per cent larger than in the same month of 1904.

"Foreign commerce at the short week showed gains of \$1,248,400 in exports and \$607,122 in imports, as compared with the movements of a year ago.

"A firm tone continues to prevail

"A firm tone continues to prevail in the hide market, although there is some evidence of irregularity.

"Failures this week numbered 180 in the United States against 200 last year, and 23 in Canada, compared with 16 a year ago."
